

Symposium on GEOPRACTICES – 2021

About the symposium: IGS Hyderabad Chapter is very active in organizing symposiums and conferences since last decade. This Geotechnical Engineers symposium (Geopractices) is a platform provided for researchers, practitioners and post-graduate students working in the area of Geotechnical Engineering and Geo-Environmental Engineering, to share their knowledge, highlight their research findings and exchange information with fellow geotechnical engineers. Enthusiastic practicing engineers are also welcome to participate and share their knowledge of professional practice. This helps to forge a stronger symbiotic relationship between the academia and the professional world. The programme is to be held in virtual mode.
